Search Notes

Dear Examiner Swartz:

Please find attached the results of your search for the above-referenced case. The search was conducted in the Business Methods Template databases appropriate for the application.

I have listed *potential* references of interest in the first part of the search results. However, please be sure to scan through the entire report. There may be additional references that you might find useful.

Dialog search results are presented in two formats, Word (.doc) and Acrobat (.pdf).

If you have any questions about the search, or need a refocus, please do not hesitate to contact me.

Thank you for using the EIC, and we look forward to your next search.

Detailed Description

Claims

English Abstract

A system and method for providing a user with guaranteed minimum retirement income payments is disclosed. A variable immediate annuity module receives an initial payment. The module uses the payment to generate periodic retirement income. This income is compared to a user defined minimum income. If the periodic retirement income payment is less than the defined minimum income, an adjustment module calculates a difference of the two income amounts, pays the minimum income and stores the difference as an account balance (Figure 5).

Detailed Description

Detailed Description

... its intrinsic value at all times. This very pure version of neutrality
is not a practical target. Even if the adjustment process
were continuous, leaving no time gaps for intrinsic value to
diverge from actual value, the data required by the process
is neither continuously available nor error free. There is an unavoidable
element of approximation...based home valuation is feasible, daily
adjustment might be easy and quite reasonable. Daily adjustment should
eliminate any problems with deviations from intrinsic value
due to temporal gaps between adjustments. Of course, the accuracy of the
adjustment process itself remains a concern independent of
frequency.

The Analytic Machine for Implementing ANZIE-DOOR

Figure 5 is a flow chart...Version and Other Possible Features

It is simple to combine versions, resulting in an approach that yields a

lump sum payment plus an annuity type of payment. The investor accrues insured equity, committed equity, or some mix between the two each period based on the payment to the homeowner for that...

Detailed Description

Detailed Description

... stream of income by simply withdrawing an amount (let's say, for example, \$5000) every year. However, this stream of income is not guaranteed for life. On variable annuities, the investment funds can decline in value significantly. On fixed annuities, the Certificate Owner can outlive the accumulated funds. On indexed annuities, the...

...certificate owner's investment account value using an applicable one of said participation rates and an index value. The processing module may make no adjustment to said investment account if the index value is not positive.

Yet another aspect is a computer-implemented method of administering a plurality of annuity accounts, comprising: establishing in a data...

...otherwise.

Once the payment entitlement date is reached, the Certificate Owner can decide when to have the issuer commence periodic payments. (The annuity product preferably provides a table, formula or other method for determining the maximum amount of payments so as not to reduce future benefit guarantees, or it allows the Certificate Owner, prior to annuitization, to set an amount.) ...all times equal to premiums received less any withdrawals made, with both accumulated at the guaranteed minimum interest rate.

Benefit Value The benefit value is the greater of the account value and guaranteed minimum value.

4. CERTIFICATE BENEFIT PROVISIONS This certificate provides for the payment of four different types of benefits: (a) surrender benefits; (b) death benefits; (c) lifetime benefits; and (d) annuity benefits.

Once a benefit becomes payable, all other benefits expire. The only

exception is when a death benefit becomes payable and the designated beneficiary...

...You may change the Annuity Payment Option at any time by written notice at least 30 days prior to the annuity date. Unless you choose otherwise, payments will automatically be based on Option B: Life Income with 10 Years Guaranteed.

Annuity Date Unless otherwise specified by you in the application, the annuity date is automatically the mandatory annuity date. The mandatory...

...Surplus We will not pay any dividend on this certificate.

Certificate Settlement All amounts due under this certificate will be paid from our office in United States currency.

Protection of Proceeds No beneficiary or annuitant may commute or assign any payments under this certificate before they are due. To the extent permitted by law, no payments shall be subject to the...to pay the amount applied, if less than \$2000, in a lump sum rather than in the form of regular payments.

The following annuity payment options are available under this certificate.

Option A —Life Income We guarantee regular payments for as long as the payee lives. Payments stop when the payee dies.

Option B-Life Income with 5, 10...

...sum payment equal to the present value of the remaining payments, commuted at the rate used to compute the regular payments.

Guaranteed Monthly Payments per \$1000 Applied The minimum monthly payment for each \$1000 applied under each annuity payment option is given in the Monthly Annuity Payment Rate Table. The payee will receive the higher of these guaranteed minimum payments and those we then currently offer as of the date of the first payment.

The Monthly Annuity Payment Rate Table is based on the minimum guaranteed interest rate of 1.5% per year and the 2000 Individual Annuitant Mortality Table for Options A, B and C...partner opt to continue to receive the periodic payments permitted under the Income

Tax Act on the death of the Annuitant, the Guaranteed Minimum Withdrawal Benefit will continue to apply to those periodic payments.

15.16 Changes to Guarantee Options When you select the Guaranteed Minimum Withdrawal Benefit to apply to Non-GWB Units, you also may change the...

English Abstract

A system and method for providing a user with guaranteed minimum retirement income payments is disclosed. A variable immediate annuity module receives an initial payment. The module uses the payment to generate periodic retirement income. This income is compared to a user defined minimum income. If the periodic retirement income payment is less than the defined minimum income, an adjustment module calculates a difference of the two income amounts, pays the minimum income and stores the difference as an account balance (Figure 5).

Annuity product for guaranteeing target value of account on
given target value date, has blended investment guideline structure
adjusting investments, where product guarantees target value at
target date

Original Titles:

SYSTEMS AND METHODS FOR PROVIDING A DEFERRED ANNUITY WITH A TARGET
DATE RETIREMENT BENEFIT

Alerting Abstract ...NOVELTY - The product has a blended investment
guideline structure adjusting investments, where the product
guarantees a target value at target date. The target
value is based on an initial investment into a contract account, and
an account holder is required to follow investment guidelines. The target
value is adjusted upward when the contract account value
exceeds the target value at a predetermined date e.g. anniversary date. The
structure adjusts investments with respect to...

USE - Annuity product for guaranteeing a target value of an
account on given target value date...

...ADVANTAGE - The annuity product guarantees a fixed benefit
at a future date for e.g. retirement date, based on an initial investment

into an annuity contract where the annuity holder is required to follow investment guidelines set by the annuity issuer, thus providing a guaranteed amount or target value at a target value date in future, and hence protecting the account holder while enjoying benefits. The product offers a walk-away value of a maximum anniversary value locked in a year in past on any target value date. The investment profile of the account value can be automatically adjusted to be conservative based on the evolution of contract with respect to account value. The target value is considered periodically, and can be adjusted up to account value to incorporate positive investment performance. The schedule of allocations is completely transparent to the owner...

...DESCRIPTION OF DRAWINGS - The drawing shows a flowchart illustrating a method for guaranteeing a target value of an account on any given target value date.

Annuity product administering method for data processing system, involves

making account value and present value of periodic income payments diverge such that value of income payments is increasingly greater relative to account value

Alerting Abstract ...The method involves paying an income payment to an account owner, and subtracting amount of the income payment from an account value. The account value is adjusted, and the amount of the income payment is re-determined. The income payment paying, account value adjusting and amount of income payment re-determining processes are periodically repeated. The account value and present value of the periodic income payments are made to diverge such that value of the periodic income payments is increasingly greater relative to the account value during a payout phase of the annuity account....USE - Method for administering an annuity product for distributing income from an annuity contract in a data processing system (claimed...

...ADVANTAGE - The method allows the insurance companies to provide additional guarantees that affect the income benefit including roll up, periodic step-up of income base to account value, and/or minimum payments. The initial income...

...account value, or the initial income benefit is established as in a traditional annuity and indexed conveniently than the account value, thus assuring the divergence of the respective values of the income benefit and account value over the lifetime of the account owner...

TITLE: Comparing the Economic and Conventional Approaches to Financial
Planning

AUTHOR(S): Gokhale, Jagadeesh; Kotlikoff, Laurence J.; Warshawsky, Mark J.

AUTHOR(S) AFFILIATION: Unlisted; Unlisted; Unlisted

PUBLICATION INFORMATION: National Bureau of Economic Research, Inc, NBER
Working Papers: 7321

PUBLICATION DATE: 1999

LANGUAGE: English

AVAILABILITY: <http://www.nber.org/papers/w7321.pdf>

DOCUMENT TYPE: Working Paper

ABSTRACT INDICATOR: Abstract

...ABSTRACT: retirement, after retirement, and in the event of an untimely
death of the head or spouse. It then determines the amounts of
saving and life insurance needed to achieve these targets. The
economic approach is based on the life-cycle model of saving. Its goal
is...

... that it wants to preserve that living standard in the future. Although
spending targets under the conventional approach can be adjusted
in an iterative process to approximate those derived under the
economic approach, there are practical limits to doing so. This is
particularly the case...

...24 cases, 20 of which are stylized and 4 of which are actual households.
The two software programs recommend dramatically different
levels of saving or life insurance in each of the 24 cases.
The different saving recommendations primarily reflect ESPlanner's
adjustment for household demographics and borrowing...

... s accounting for contingent household plans and for Social Security's
survivor benefits. The less detailed tax and Social Security
retirement benefit calculations used in our implementation
of QFP also explain some of the differences between the two programs.

 Employers May Not Offer Group Annuity Benefits
 Geisel, Jerry
 Business Insurance v17n32 PP: 1, 6 Aug 8, 1983
 ISSN: 0007-6864 JRNL CODE: BIN

ABSTRACT: To comply with a recent Supreme Court ruling forbidding the use of a sex factor in retirement benefit calculations, insurers offering group life annuities plan to market new and revised programs providing men and women with the same fixed monthly benefit. Benefit experts do not expect these unisex group annuity products to sell well to male employees, who the experts say are more likely to take a lump-sum accumulated benefit and buy an individual annuity from an insurer at the old benefit level. (The Supreme Court

decision, in Arizona Governing Committee versus Norris, does not apply to individually purchased annuities.) Without male participation...

...success for their new unisex group life annuity products, citing convenience as a major selling point. Insurers plan to use different strategies to determine new benefit levels.

...a performance driven organization". In sync with this strategy, the company is implementing a compensation structure across the organization that ensures external parity with the best paying companies in the industry segment. "At the same time the reward systems will ensure that compensation is strongly linked to...tied to business strategy". However, Mr.Vijayakumar outlines a way forward: "It is very important in this context that HR function,which generally handle compensation in most of the organisations need to have an integrated linkage with business to positively contribute to business strategies. This...

TEXT:

...value (i.e., the price that should have been paid), reflecting the overpayment in price at the deal closing.

Integration gap - The difference between the real value and the achieved results, reflecting the value eroded after the deal has closed.

So, how can HR people help eliminate...

...that HR holds a credible position within the acquiring company and that this role goes well beyond the relatively ministerial functions of routine reviews of administrative processes, compensation structures, and analysis of benefit plan costs.

Due Diligence: Linking Transaction And Integration

In-depth due diligence begins in earnest...in the U.S.

Pension liabilities

These liabilities are sometimes greater than the deal price itself, particularly where major defined benefit pension plans exist, including the U.S., the U.K., Japan, Germany, The Netherlands, Canada, and countries with substantial termination indemnity...

...backing the liabilities and the true actuarial liabilities, rather than the liabilities recorded. For synergies, the critical point is to ensure that the valuation model reflects realistic and accurate data and appropriately allows for local legal issues that affect the timing and size of...

TEXT:

...a planner will face during this transition is the "cash-flow crevice"; that is, the black hole in one's income stream. Low-load insurance can turn out to be a great transition tool when shifting from a commission- to fee-based income.

Let's...a subaccount that has the highest management fees. For a 50-year-old male with \$1 million of coverage, the difference in cash value projected in the 30th year is almost \$200,000! Which policy is better? They are the same policy!

Using the...

...600. Run an illustration, go back and adjust the lapse expense ratio downward 30% and run the illustration again. The difference in cash value projected in the 20th year is \$8,000. Same policy, but with just one of the many cost factors "tweaked...insurance planner/adviser understands the application of insurance in planning concepts, but has been weaned on bundled costs and hidden compensation. Unbundling premium functions, full disclosure and compensation acknowledgement become a major psychological barrier.

Then there is the misconception that you can compare policies by comparing illustrations. The...

...change, and often the design is manufactured specifically to illustrate well. Think about it: We cannot project or illustrate mutual funds, market performance or variable annuities, but we can project a policy's performance which has more variables than any of the aforementioned products.

Our experience has...
